Objective

A passionate and highly motivated Full Stack Developer with a strong understanding of web development technologies, eager to contribute to building impactful web applications. Looking for an opportunity to apply my skill in both front-end and back-end development to create efficient and user-friendly solutions.

Skills

Technical Proficiency:

- Frontend Technologies: HTML, CSS, Javascript, React
- Backend Technologies: Java, Node JS, Express JS
- Databases : MySQL, Mongo DB
- Version Control: Git, Git Hub

Non Technical Proficiency:

- Problem-Solving
- Critical Thinking
- Decision Making
- Project Management

Projects

Registration Form:

Description: Developed a user-friendly and responsive registration form that collects basic user information such as name, email, password, and phone number. The form includes front—end validation to ensure data integrity before submission.

Technologies Used: HTML, CSS, JavaScript

Hospital Management website(Online Doctor Booking):

Description: Developed a web-based hospital management system that allows users to book doctor appointments online. The platform enables patients to view available doctors, check their schedules, and book appointments. Admins can manage doctor availability and patient data.

Technologies Used: React.js, Express.js, MongoDB

Education

Full Stack Java
